

MECHANICAL ENGINEER

Industrial Tech Services, Inc. is seeking a Mechanical Engineer for their Trinity division in Georgetown, Kentucky. The Trinity Division is engaged in sales and maintenance support for coating system applications based on Trinity Industrial Corp.'s technology, as well as new installation and modification of coating equipment.

Key components to this job include:

1. Discussion with customers

We have basic knowledge of Painting Booths, Ovens, Conveyor Systems, Pretreatment systems, and E-Coat systems, and hold meetings with customers. It doesn't matter if you can't design.

And We will confirm the customer's requirements with Trinity Industrial Corp. in Japan, and You will prepare our proposal. Then We will continue to discuss with customer. Inquiries can be made in English, not Japanese.

2. Estimation work

We will request to provide Trinity Industrial Corp. in Japan about design, Japan's supply parts cost. And We will get Local Supply parts price in the United States. And also ask the subcontractor to make an estimate for manufacturing and installation, and finally we will complete the overall estimate.

3. Work after receiving a Customer PO

① Confirmation of specifications with the customer

② Arrangements in the United States (equipment and production, cost control)

③ Instructions for installation and on-site modification: In addition to managing the schedule, we will issue construction instructions to subcontractors and proceed with construction on-site.

④ Coordination work: done with Japanese SV

⑤ Acceptance inspection work for customers

4. Work location

① You basically work at the ITS office.

② Depending on the location, we may need to travel to meet with customers.

• Canada/Indiana/Mississippi/Texas/Mexico/Japan

5. Other

In this ITS, You will work with two Japanese engineers from Trinity Industrial Corporation. There is no problem even if you do not know the technology of Trinity Industries.
